Acta Reumatológica Portuguesa offers an online submission and article review platform at www.actareumatologica.pt. Either by directly accessing the platform or following the URL provided in the email invitation to review the article, Reviewers and Associated Editors can collaborate and follow the complete editorial process for articles they were asked to review, from submission to publication.
Select the most suitable option:

“Accept” if you wish to review the article

“Invite other Reviewer” if you are not available to review the article and wish to suggest another Reviewer

“I’m not available right now” if you are not available to review the article

---

In order to work on the article, the Reviewer has access to the menu with the different options available for this user profile.

Under “Messages” you will be able to exchange direct messages with all of those involved in the article’s editorial process such as Chief Editor and Technical Editor.
Under “Reviews” you will have access to your review’s submission form. Once the review process is finished the Reviewer must communicate the article’s evaluation to the Authors. In order to do so, the Reviewer has to fill in the review form and select the most adequate observations.
## RECOMMENDATIONS FOR ACCEPTANCE

- **Accepted without changes**

- **Conditional acceptance after minor corrections**  
  Indicated in the notes for the author.

- **Conditional acceptance after major corrections**  
  Indicated in the notes for the author.

**Not accepted**

- Lack of scientific relevance
- Lack of originality
- Wrong methodology with consequent erroneous conclusions
- Another reason (see comments to Editor/Author)

## REVIEW

- I want to review future versions of the manuscript

## NOTE TO THE AUTHOR

Please mention the section, page and line that the comments refer to.

## NOTE TO EDITOR
The Reviewer can attach any useful documents to the reviewed article. The Reviewer should, however, make sure that the attachments do not identify himself as such.

After the Reviewer selects the option "Send review" the Authors are notified and receive the review's result. The Author should then make the requested corrections and resubmit the article in due time (1 month).
After all corrections are done, Authors resubmit the article and reviewers are notified of this by email. Following the link on the email, the Reviewer can access the article’s new version which should come with a response letter addressing the Reviewer’s comments and the reviewed article highlighting corrections with tracked changes. This will help the Reviewer spot differences and improvements.

All previous steps will be repeated until the reviewer finds the article ready to be accepted. When that happens the Reviewer should select the option “Accepted without changes” so that the Chief Editor is notified of the acceptance suggestion.
